Step-by-step guide
Setting up an Animaker account

To create an account on the web:

Go to www.animaker.com

As you can see the free version allows you to work with the basic functions but there are limitations.

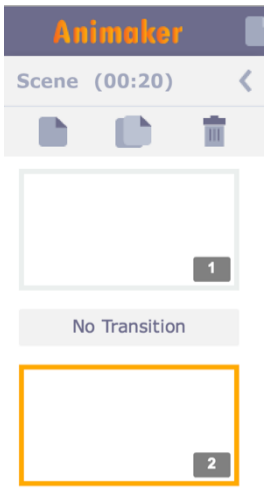
Getting started

The interface at Animaker is really clear and easy to use. It's made up of 5 sections

1. MENU found at the top of the screen

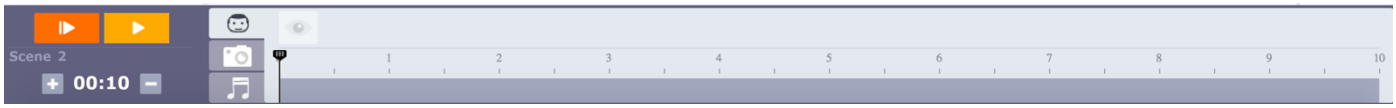
Here you can find the various options to create a new file, save, modify etc, and the space to give a title to the project, and the choice of the type of presentation that could be HAND CRAFT, 2D or INFOGRAPHIC.

2. SCENE found on the left of the screen



Here are the options for duplicating a scene, creating a new scene, cancelling.
The scenes are displayed in order and with the transition effects from one scene to the next.

3. TIMELINE is at the bottom of the screen



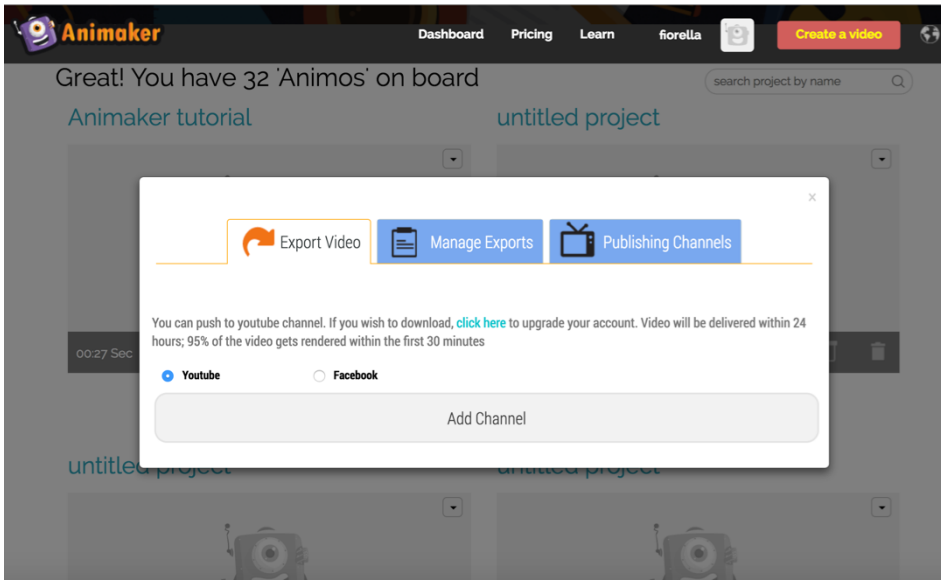
Here you can regulate the duration of each singular scene (from 1 second to a maximum of 15 seconds). The timeline is divided in three sections relative to the characters and objects (text etc.), to the effects of the camera and music. You can regulate the entry and exit times of the elements in the various sections.

4. LIBRARY is on the right of the screen.

Here are all the elements that can be used internally in the scene such as the characters, objects, background, text, music, effects, transitions etc. It is also possible to upload images or sounds.

5. WORK AREA is situated in the middle of the screen.

In the work area, you have the possibility to select the entering and exiting effects of the characters and elements, some useful tools for regulating the effects of the camera and the visualising the grid. You can also increase or decrease the view of the scene.



It is possible to upload directly on YouTube. To download the video you must have the payment version.
If you don't mind having only the video without audio you can use QuickTime and record the screen while playing the video.

Scan this QR-Code and watch the Animaker tutorial video.
