Step-by-step guide
Khan Academy style video creation

What is it SnagIt?

SnagIt is a program that allows you to take screenshots of your computer, edit and format them and also captures video display and audio output. If you want to create a flipped classroom video or create a poster or hand-out than you'll probably love SnagIt.

Some of its many uses…

- Take screenshots
- Edit images
- Capture video with audio
- Create a hand-out from a graphical video
- Blur out sensitive information
- Add tags and Keywords
- Quickly create How To documents
- Provide feedback to students
- Watermark an Image

In this document, I'll be showing you how to create a simple Khan Academy style video using SnagIt

What is Smooth Draw?

Smooth Draw is a free drawing and painting program for that runs on Microsoft Windows. It comes with lots of various pens, pencils & paintbrushes. You can adjust the ink flow for each brush and you can also adjust the settings for tablet pressure and hardness. It is accessible enough that beginners can use it, but it packs enough advanced features to be useful for serious artists also.

What is a writing tablet used for?

A writing tablet is a device that allows you to take notes digitally just like pen on paper. Basically, when you write on a tablet with a pen called a stylus the text appears on your computer screen.

Step by Step Guide

1. **Open Program Smooth Draw**
   Click on the Start button and select the Program Smooth Draw

2. **Select the brush size you want to use**

3. **Select your preferred InkFlow**

4. **Select your preferred pen of choice**

5. **Change background to black**
   - Go to the white/black boxes at the top and click on the swap simple
   - Click on file new and the background screen will go black.

6. **Select the ink colour**

7. **Change the aspect ratio**

8. **Open SnagIT**
   Now that you're ready to begin you'll need to open SnagIt to capture your lesson

9. **Start Capture**
   Click on Start new Capture 'the big red button'.

10. **Select the area you want to capture**
    Drag the course to highlight capture area

11. **Record**
    Hit the record button. Set the audio output here to your microphone.

12. **Hit stop when finished**
    This will open the edit program

13. **Edit Movie**
    Crop out areas you don't want

14. **Share**
    Share your movie to YouTube.
